- 1) Ok
- 2) Yes, if you can go in and update Q1 and Q2 accomplishments.
- 3) I don't think there are slides – just using the one pager that is being used for PPDC

thanks

**Subject:** checking in

I've been working since early this morning and am going to wind down for the day, so I won't be calling in to the IT strategy meeting w/Nikos unless you really need me there.

One question from the management meeting - do you also want accomplishments from FY17 Q1 and Q2 from me and Kimberly?

Finally, on the ESA presentation for CLA, I haven't seen the slides but can review if needed. As you know, the important message which wasn't communicated in the senior science advisor meeting is that we heard their recommendations (based on the June 2016 stakeholder and public comments on the draft BEs for the first 3 pilots) and we will work on streamlining the BEs between draft and final BEs for carbaryl and methomyl - also a heads up that draft BEs for C/M will be similar in scope to final BEs for first 3 pilots.

Thanks,

Anita
